PUBLIC MAY TOUR CHRONICLE PLANT IN S. F. NEXT WEEK

The free press of the world, which means the press of America, will celebrate National Newspaper Week next month. It will be a week set aside to honor the Nation's editors, the nation's reporters, the nation's printers, the men who give on-the-spot coverage from Europe's battlefields.

Their importance today is no secret.

They supply us with the grist for the mills of the nation's thought and opinions. They are writing, and editing and printing history. The newspaper today is a governor for a world machinery that is screaming in high gear.

The pages of your newspaper do not fall independently into place, nor print themselves. They represent organization, judgment, hard work, certain and skilled knowledge of an exacting trade.

Getting out a newspaper on time every edition, every day or week, is no picnic. And today, as never before, getting out a newspaper is vital. That is why there is going to be a week set aside and dedicated to American newspapers and American newspapermen. National Newspaper Week is a

time for you to show your appreciation of the world's free press — of a press that can only be free because it is printed in a free country.

Your allegiance belongs in your own home town and to your own home town newspaper, but, perhaps, between September 30 and October 6, some of you will be going to San Francisco.

If you are there during these seven days, you have a standing invitation to visit the great plant of The San Francisco Chronicle, to see, on tours conducted by trained guides, The San Francisco Chronicle in action. The tours will start every hour, on the hour, from noon until midnight at The Chronicle, Fifth and Mission streets.

It's your chance to see the metropolitan press with its sleeves rolled up. It's your chance to learn more about the nation's newspapers, the free press of the world.

Ready To Answer For Our Chris-
tian Hope?

Sunday October 6, this church
in fellowship with all Christian
churches throughout the world,
will observe World's Communion
Sunday.

In these days when the ties that
have bound the peoples of the
world together in cultural relat-
ions are being rapidly dissolved
and the forces of Pagan Nihilism
are stalking the world to destroy
every trace of human freedom,
above all the freedom to worship
God, are we ready to answer for
our Christian faith and hope?

We earnestly hope that all
Christians everywhere, mindful of
our perilous times and the price-
less values of our Christian tradi-
tions, will gather to renew their
faith and strengthen their resolu-
tion to the end that these great
values shall not perish.

Announcing the big NEW FORD 1941 FORD

In some years, some cars
take a big jump ahead. The
Ford does that for 1941.

It has jumped ahead in
size. It's the biggest Ford
we've ever built, inside and
out. It's wider. It has a longer
wheelbase. Its seating room
is wider by as much as 7
inches. It has new wide
doors and semi-concealed
running boards.

You'll notice also a new
beauty, achieved by a skilful
blending of mass with longer
flowing lines. Larger wind-
shield and windows give bet-
ter vision all around.

One of its biggest advan-
tages is the new soft ride.

New, slower-action springs
give a slow, gentle, gliding
movement. A newly designed
stabilizer helps absorb road
shocks, and maintains bal-
ance on sharp curves and in
cross winds.

More rapid acceleration to
match its familiar speed and
power makes this new Ford
an even livelier car to drive.

These are only a few of
this new car's outstanding
features. It represents all the
rich experience gained in
building more than 28 mil-
lion motor cars.

Any Ford dealer can give
you many good reasons for
making this your 1941 car.

MODERN LAMPS for COMFORT SEEING-

Have you tried one of the new swivel-arm I.E.S. lamps? It is an adjustable light. Swing it close over a chair while reading intently. Swing it around to bridge table or piano. Nothing stiff or formal about this kind of light. You'll like it.

Do you like lots of light at times? You know, for sewing with blue thread on black cloth, you must see each fine stitch. Then you will want a lamp that you can turn on "full up." That is where you will appreciate a one-two-three lamp, especially a 200-300-500-watt ALL PURPOSE Floor Lamp.

Young folks want and need the very latest in lighting! Studies are harder than in the days when Ma and Pa went to school. That is why eyestrain is more prevalent among school children now than a decade ago. Give eye protection to the student's in your family with an I. E. S. Study Lamp. Its low cost will surprise you.

ARMY VOLUNTEERS CUT DOWN QUOTAS UNDER CONSCRIPTION

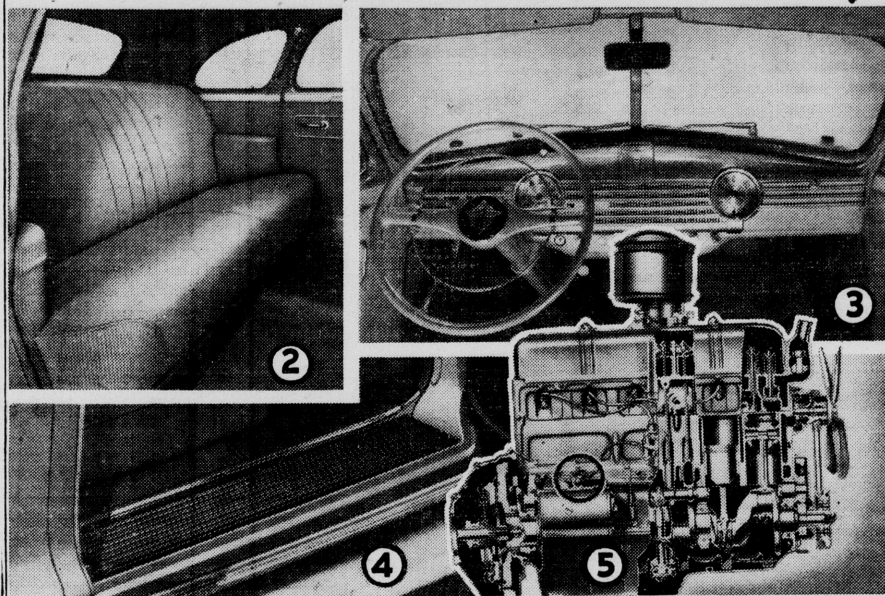

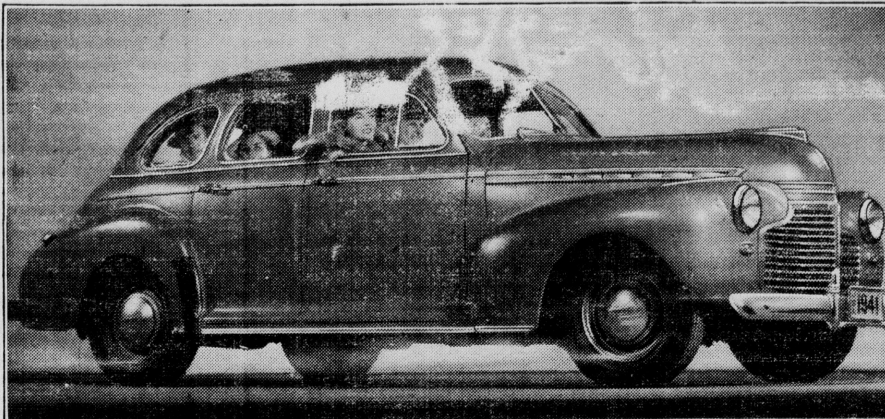

Information has just been received at the local United States Army Recruiting Station, Oakland, that quotas under the proposed conscription law for the various areas will be somewhat lowered depending upon the amount of voluntary enlistments and men already in the service from the area, according to Lieutenant Dover, local recruiting officer. This means that an area having a large number of voluntary enlistments will not be called upon to furnish as large a number of conscripts as an area, with the same population, where voluntary enlistments are not so large.

Vacancies now exist for practically all branches of service at various posts on the West Coast and as far inland as Cheyenne, Wyoming.

There has been no change as yet in the length of enlistment, three years. Applicants must still be single, without dependents, between the ages of 18 to 35 years, of good moral character and in good physical condition.

Miss Gertrude Mozzetti spent the last weekend with Mr and Mrs J. Berseni of San Francisco.

Beauty Reaches All-Time High in New '41 Chevrolet

Completely new styling joins with numerous mechanical improvements to make the new 1941 Chevrolet, now on display at all dealers', a worthy successor to the cars which have earned first place in public favor year after year. The greater size and roominess of the new models, as well as their sleek new beauty, are apparent in the Special De Luxe Sport Sedan, shown above.

At (2) is shown the spacious interior of the same model's rear compartment, and at (3) is its front compartment, showing two-spoke steering wheel with horn-blowing ring, new sliding-type sun visors, and smartly re-styled dash.

One of the major changes is substitution of concealed safety-steps (4) for the running boards of other years, an improvement adding to the car's beauty without sacrifice of the safety and convenience which running boards provide. At (5) is the six-cylinder Chevrolet valve-in-head engine for 1941, in which many refinements have been made. Horsepower is increased from 85 to 90 without affecting economy; and cooling, lubrication and carburetion are all improved. In circle is the new switch which reverses the ignition current polarity each time the starter is operated, indefinitely prolonging the life of distributor points.

If It's Heavily Advertised It HAS to be GOOD

OUR BRAND of democracy was won for us, and is being held for us, by men who chose their own careers, owned big farms, built big factories, and did what selling was necessary to keep those farms and factories busy.

One of the biggest aids in mass selling is mass advertising. In the long run, it "polices" itself.

Advertising of poor products al-

ways fails. Only a first rate product, fairly priced, can stand the dazzling glare of national advertising. When you think of the heavily advertised soups, soaps, breakfast foods, mechanical refrigerators, automobiles, silverware, radios—you are thinking of the aristocrats among commercial articles.

JOHNNY GETS HIS GUN

The date of October 16, when 16,500,000 young Americans will register for military service, is of immense significance in the annals of this nation. Never before has the United States entertained the thought of compulsory service in time of peace — not even in 1916, when sentiment for preparedness swept the country. To the historian, however, looking back from the perspective of half a century hence, draft registration day will seem but the natural, expected and inevitable final event in a logical series.

Preparation for modern war is so vast and costly a process, and so complex, that from the very beginning no alternative to peacetime mobilization was practicable. It actually went into effect long weeks ago, when every man, woman and child of America's 130,000,000 population was drafted to pay for the cost of a war machine. Already sixteen billion dollars of money yet to be earned has been earmarked. Every American is conscripted to sacrifice something of his salary or savings or insurance or business through added taxes for preparedness. Business, too, is subject to conscription, so that any plant owner who might refuse to place the national welfare ahead of his private interest may be compelled to do so. Yet mobilization of national income and producing power would be meaningless without an adequate force of men thoroughly trained in use of the complex machines of modern combat. The soldier of this day must be a specialist of high skill. The pioneer with his trusty rifle is as out of place in mechanized warfare as a logcabin builder would be in the machine shop of an airplane factory. When Johnny gets his gun — his tanks, planes, automatic rifles, machine guns — he'll have the most effective weapons American genius can contrive, and he'll be a master at using them. And for those very reasons, he may never need to use his gun at all.

THE "BUGS" IN JOB INSURANCE

Like a new model of machinery, the Unemployment Insurance Act of California has developed "bugs" to challenge its builders. Experience has revealed some of the flaws; and others are definitely indicated by comprehensive statistics in the new State blue book on employment and payrolls and supplemental data. It is a moot question whether the law has worked more of benefit than of harm among the 1,280,000 workers it covers.

During 1939, employers and employees contributed \$75,809,000 to the insurance fund — nearly twice the sum of \$38,592,000 drawn from the fund. The figures corroborate the complaint in business circles that much working capital is being drained from job-making commercial circulation. Irregularities penalize many earnest workers and many businesses. Once admitted to the fund, workers frequently refuse further employment until they have drawn the allowable limit. In such cases insurance funds are expended on the encouragement of drones, in contravention of the central purpose of the act. The employer whose business normally fluctuates finds himself banned from insurance rate reductions because his workers "come and go" on insurance fund records — whereas the employer is in no way at fault and workers in seasonal

Hollywood Goes for Willkie

The Hollywood, which has been Democratic for several years, has joined the parade of personalities supporting Wendell L. Willkie for president. Here is Arthur (Dagwood) Lake talking with Lucille Johnson of the Hollywood Young Republicans about "the man of the hour." Lake, you'll notice, is wearing the biggest Willkie button in the state. They do things in a big way in Hollywood.

MOST EXTRAORDINARY!

It is nothing short of amazing that, within six weeks of a presidential election, not a scrap of publicity is issuing to newspapers from either national or state Democratic headquarters.

One hears that Mr. Roosevelt says it is undignified to wage a campaign for re-election, now that he is president. Back in 1936, when he was still president a very lively campaign was waged for his re-election, if not by the president himself, then by his party leaders.

Four years ago every newspaper's mail was loaded with news releases, pictures, charges and counter-charges proceeding from the camps of both major parties.

This campaign, there is an acceptable amount of material in the mails, both from the independent Republican candidate, and from Republican sources, but not a scrap of material from the Democratic side.

Either Mr. Roosevelt feels as secure as an ostrich with his head in the sand, or Mr. Willkie's surprise nomination and whirlwind—though often inaccurate—strategy has the opposing camp stymied or in a sand trap.

Whatever the reason, this is something new in a political campaign, resembling Teddy Roosevelt's bolt of the stereotyped Republican party in 1904, when he headed up his own Bull Moose party and rode handsomely into the presidential chair.

The public flocks to share in anything spectacular and Willkie is surely putting on a good show.

(Overheard at Treasure Island last Saturday afternoon as Willkie was making bear-paw gestures in the tonneau of his open car after his speech at the federal plaza: Old Lady: "Isn't he sweet?") (Editor's note: Willkie is about as "cute" to look at as Maxie Bear, with Maxie holding the edge!) —W.W.

(Wednesday morning. — Well! Here comes the first envelope of news releases from the DEMOCRATIC headquarters just opened at 388 17th. street in Oakland. A general story on DEMOCRATIC activities appears elsewhere in this issue. —Ye ed.)

trades create one of the major problems of temporary unemployment which the law was supposed to eliminate.

Now that a detailed record of performance is available, one of the first orders of business for the Legislature when it convenes in January should be a thorough committee study of the Act and its workings. The "bugs" should be eliminated; the law reviewed critically and constructively. The drain on payrolls can be justified only by positive results. It isn't enough to spread a job insurance enactment on the statute books. The law must be made to work.

AN ORCHID TO AN OKLAHOMAN

For succinct and forceful expression of horse sense on money matters we hand the palm to the editor of the Daily Oklahoman. He writes:

"Now our Government, in spite of a \$45,000,000, 000 national debt and in spite of the necessary expenditure of additional billions for national defense, is on the eve of lending \$500,000,000 to the republics of South America. The bonds of some of those South American countries are now selling on Wall Street for as little as 8 cents on the dollar. One of those countries can take \$50,000,000 received from the Federal Treasury, purchase \$50,000,000 worth of its own bonds for \$4,000,000, have \$46,000,000 left in its treasury and be entirely free from debt. And the American taxpayers will have paid the debt of the impoverished South American republic.

"The Good Book tells us that the Creator made man of the dust of the earth. He must have made us Americans of slippery elm: We are so amazingly easy to skin."

MASONIC HOME NEWS

By J. H. HEATH

Twenty members of the home family composing the first excursion to the Golden Gate International Exposition on Tuesday September 10 returned highly pleased with Superintendent Hartman's arrangements.

In 1939 the trip to Treasure Island was made in sight-seeing buses, leaving the home soon after breakfast and returning in time for dinner. Transportation was free, as was admittance to the grounds, rides on the Elephant trains, cafeteria lunch and admission to the Cavalcade and one or two other concessions. Each excursion was made under the personal supervision of Mr. Hartman.

This year transportation was by regular automobiles operated by the home. Announcement of the plans was made by Director Hartman during lunch, Monday. He stated that those wishing to go to the fair should register right away and that provision had been made to take a few at a time until all had been taken care of.

Upwards of 75 signed up before sun down. Twenty persons left the home shortly after 1 p.m., Tuesday September 10, four in the pilot car, driven by Mr. Hartman, and the balance in cars with Jack Witcosky and Walter Greaves as chauffeurs. Every person wore a modest white badge bearing the words: "Masonic Home of California."

Arrival at the fair was in time for the start of the afternoon performance of Aquacade, then dinner at a cafeteria followed with the Cavalcade, a joy ride on an Elephant train around the grand circle closing the festivities.

Arrival back home was at 10 o'clock, with everybody well pleased with the outing.

A similar excursion was to be made before the end of this week with more to follow next week, and so on until all who wish will have the chance to go.

We Call It Romance

IT'S JUST a can of soup. But during a long lifetime, the man who made it found some way to advertise it. At first, just a sign over his little soup kitchen, a few newspaper ads, a few billboards. But as the advertising grew, so did the business.

Now the business employs thousands of workers, helps to support tens of thousands of retail clerks and transportation men, and gives the housewife a better, cheaper soup than she could prepare at home.

Back of every heavily advertised article is a romantic story of this kind—the kind of romance that built America.

MANY GROUPS ENDORSE EAST SHORE HIGHWAY

(Special to The Register)

OAKLAND — Armed with resolutions from all sections of Central California endorsing the construction of the East Shore Highway from Oakland to San Jose, members of the East Shore Highway Committee of Central California have made final plans to present the highway project to the California Highway Commission this Friday noon when it meets in Oakland.

Resolutions urging the highway commission to include sufficient funds in the highway budget for the next biennium to complete the East Shore Highway from Oak Street to Fiftieth Avenue have been received from the Niles Chamber of Commerce, Santa Cruz Chamber of Commerce, Emeryville Industries Association, San Jose Chamber of Commerce, J. L. Tuttle Co., Inc., Oakland; San Benito County Chamber of Commerce, Uptown Development Association, Oakland; Merced Chamber of Commerce, Chamber of Commerce of the Pajaro Valley, Watsonville; San Leandro Chamber of Commerce, Modesto Chamber of Commerce Livermore Chamber of Commerce, Downtown Property Owners Association, Oakland; Tracy Chamber of Commerce Tracy Lions Club, Tracy Rotary Club, 50-50 Club, Oakland, Oakland Unit of the California Association of Collectors and the Oakland Chamber of Commerce.

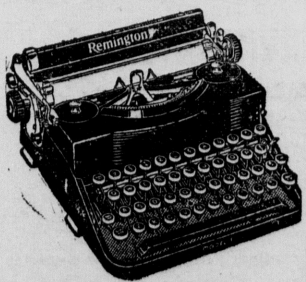

Copies of these resolutions will be presented to California Highway Commission at its Friday meeting, according to A. J. Petsche, member of the East Shore Highway Committee of Central California.

"Action by these civic groups scattered throughout Central California clearly indicates the importance of the East Shore Highway to this part of the state," declared Petsche. "The proposed highway not only would aid Oakland in solving one of the worst traffic problems in California, but it would provide the motorists of California with a means of getting into and out of Oakland without fighting heavy traffic."

A Virginia family was training a colored girl from the country in her duties as maid. On answering the telephone the first day she brought no message.

"Who was that, Sara?" inquired her employer.

"It wasn't nobody, Mr. Brown. Jes' a lady say 'Long distance from New York' and I say, 'Yes ma'am it suah is.'"

The FARMERS CORNER
by RALPH H. TAYLOR
Executive Secretary
Agricultural Council
of California

Next January, when the State Legislature convenes for its 1941 session, the State Administration will, without doubt, demand the enactment of new taxes, or increases in the rates of existing taxes.

At first glance, that may seem like a rash prediction, but actually it is almost a certainty.

Governor Olson, during the special session of the Legislature earlier this year, demanded \$50,000,000 in new taxes. He was turned down, but resented the turn-down bitterly, as evidenced by his repeated statements since that the Legislature did not act in good faith in denying him new tax sources.

Anticipating a request for new revenues and new taxes at the start of the New Year, perhaps it would be well to look over the records for the past fiscal year — the last period on which accurate totals are available.

During the last fiscal year, the State Treasury collected in taxes and turned into the State General Fund \$173,467,130.

That was \$6,843,725 more than the year previous.

Yet despite this considerable increase in income, California, today, is \$30,975,882 worse off than it was twelve months ago.

The General Fund deficit has reached an all-time high of \$82,110,558, and the debt is growing by leaps and bounds!

California farmers, who are among the State's heaviest taxpayers, have reason to study that record. For despite a heavy increase

in State tax collections, the State deficit increased even more sharply.

Perhaps, you say, it is due to relief to the aged, or the needy, or an increase in elementary school costs, but such is not the case; these costs were less than in the previous year.

The increases, during the last twelve months, have been in what might be termed the normal functions of government. And this, despite the fact that California, with the nation at large, has faced the fact that it must pay heavy increases in federal taxes to defray the cost of the national defense program.

There is no reason for beating about the bush. The plain facts are that bureaucracy has been thriving in California at the same time that the individual citizen, whether farmer or city worker, has been having a hard time to make ends meet. The plain facts are that where economy should reign, waste rules. The plain facts are that payrolls have been expanded in State service, without regard to the ability of the taxpayer to pay for new governmental frills and increased governmental services.

It is high time that the spenders of State funds changed their tune. The State collected nearly seven millions of dollars more last year than it collected the year before. Yet California winds up deeper in the red than ever before.

There is only one common-sense way to strike a balance between income and outgo, under the circumstances. And that is to cut expenses; to cut budgets. That may be old-fashioned, but certainly it is the only way out for taxpayers already burdened with exorbitant tax payments and debt.

California, like its citizens, just simply has to learn to live within its income. Most of us learned that lesson long ago; we hope our State Government learns it before January.

STRIKE CLOSES SAFEWAY STORES FOR TWO DAYS

Safeway stores in Niles and Centerville closed Monday morning among two of the 500 chain groceries and independent stores throughout the county, represented by the Alameda County Food Dealers' committee. Closing followed the placing of picket lines around the Andrew Williams market at Broadway and Moss Ave., Oakland. The picket line was maintained by the A. F. L. Retail Food Clerks' Union.

James F. Galliano, attorney for the union said the strike was called for the purpose of putting into effect the eight-hour day and 48 hour week and an increase of \$5 a week for store managers. Store owners closed ahead of the walk-out to enable them to remove perishable food.

Other local groceries now involved do not anticipate having to close. The Niles and Centerville Safeway stores reopened Wednesday morning, without the objectives of the strike having been settled.

OFFICERS TO MEET

The Past Presidents Club of De Guadalupe Institute No. 74, Y. L. I. will hold their next meeting at the home of Mrs. Madeline Santos of Centerville, with a barbecue supper preceding the meeting. The newest member in the ranks of past presidents, Mrs. Hortense Avilla of Niles, will be initiated on that evening with Mrs. Laura Mayer, president of the club presiding.

FARMERS MAY USE F. H. A. LOANS FOR IMPROVEMENTS

Farmers now may participate in all the benefits of the Federal Housing plan of financing, and several agriculturists in this county already have taken advantage of the opportunity to make needed improvements under long-term FHA-insured loans, according to N. S. Burge, farm reviewer for the Federal Housing Administration, who maintains offices in the Post Office and Customhouse, Oakland.

Farm land may be either bought or refinanced under this plan, it was declared, when at least 15 percent of the amount of the loan is used for materials and labor on construction or repair of farm buildings.

Loans are made through local lending institutions approved by the Federal Housing Administration and are insurable in amounts up to \$16,000.

Under new FHA regulations, Mr. Burge explained, the interest rate is limited to 4½ percent, plus a mortgage insurance charge of one-half percent. Payments are made in monthly, semi-annual, or annual installments, depending upon the distribution of the borrower's income. Loans may be written for as much as 80 percent of the appraised value of land and improvements, in some cases 90 percent, and repaid over any convenient period up to 20 years, with an additional five years, when necessary, on 90 percent loans.

"This means," said Mr. Burge, "that the responsible farmer now can provide his family with a modern attractive home without waiting years to accumulate the cash.
